DETAILED ACTION

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3-6, 12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicants are requested to point support in the instant specification, by page and line numbers, for the limitation "in a *single stage* under conditions that promote conversion of said metal chloride into metal oxides and *chlorine gas*".

Applicant's arguments with respect to claims 1, 3-6, 12 have been considered but are moot in view of the new ground(s) of rejection.

The 103 rejection is withdrawn in view of Applicants' amendment. Hartmann '584 only discloses multiple stages for converting a metal chloride to a metal oxide and chlorine. However, support for the now claimed "single stage" cannot be found, note the new matter rejection stated above.
